Mathematics FOR ALL

THIS was a novel experiment absolutely free-of-cost. Many who are mortally scared of mathematics got a boost after this venture. In memory of the world famous mathematician, N Ramanujam, the Ramanujam School of Mathematics organised a seminar on mathematics '*Graphs and Graphics*' at the Arya Samaj Mandir recently.

The seminar was attended by sev-

eral students, more than 500. The seminar was presided over by the young mathematician in town, Anand Kumar. The seminar aimed to help boys preparing for the IITs and other competitive exams get over their fear of mathematics. And going by the response the venture received, this experiment was a hit.
